# Author Details

## Basith Inadeen

is a Research Professional at CEPA. He obtained his Bachelor's Degree in Social Science from the University of Colombo. He holds international licenses from the Wageningen University, The Netherlands, on Multi Stakeholder Process and Social Learnings, and on Social Accountability Tools especially the Citizen Report Card methodology from the Public Affairs Centre, Bangalore, India. At CEPA, Basith is involved in capacity building and training as well as research, where he brings his expertise in action and applied research. He is currently playing a leading role working with grass roots level civil society organisations and support to build capacity on social accountability mechanisms, he has also led the Citizen Report Card survey and publication in 2014 carried out by CEPA on Secondary Education Service in Vavuniya and Mullaitivu. He currently leads the Citizen Report Card — Good Governance tool at CEPA.

## Isuru Thennakoon

works as a Junior Research Professional at CEPA. He is currently following a Post Graduate Diploma in Economic Development at the University of Colombo and holds a Bachelor's Degree in economics, economic policy and management from the University of Colombo. He also holds a diploma in counseling physiology and has worked as a counselor. Isuru is a poet and has currently published three books of poetry. He has previously worked with non-profit organisations as a project coordinator and a research assistant. At CEPA, Isuru works with the Facets of Poverty research thematic and the Communications Team. Currently, he is working on a study focusing on citizen report card and he is in charge of field coordination work of the Monaragala district.

## Kulasabanathan Romeshun

is a Senior Research Professional and a Member of the Management Team at CEPA. He has worked in the development field for the past twenty years with government and funding organisations. He has a Masters in Financial Economics from the University of Colombo. As Team Leader for the Facets of Poverty programme, Romesh and his team are responsible for collating messages on poverty, inequality and prosperity, drawing from CEPA's research and advisory activities. Additionally, the Facets of Poverty Team works on poverty measurement and is starting to look at the impact of macro factors on poverty.

## Mehala Mahilrajah

is a Research Professional at CEPA. She has a Master in Development Practice from the University of Peradeniya. She has completed a Diploma in Monitoring and evaluation at National Institute of Labour Studies (NILS) with Sri Lanka Evaluation Association (SLEvA). At CEPA, Mehala is involved in capacity building and training, as well as research, to which she brings her expertise in action research. Mehala is currently playing a leading role working with grass roots level civil society organisations and support to build capacity on social accountability mechanisms particularly the "Citizen Report Card" tool. She also has contributed to the Citizen Report Card survey and publication in 2014 carried out by CEPA on Secondary Education Services in Vavuniya and Mullaitivu.

## Hasanthi Tennakoon

has a Master's degree in Environmental Management from the University of Tasmania, and has extensive experience in corporate sustainability. Her areas of focus are environmental and social sustainability. She currently works as a research consultant for CEPA and also as a social safeguards consultant for the World Bank.

## About CEPA

The Centre for Poverty Analysis (CEPA) is an independent, Sri Lankan think tank promoting a better understanding of poverty related development issues. CEPA believes that poverty is an injustice that should be overcome and that overcoming poverty involves changing policies and practices nationally and internationally, as well as working with people in poverty. CEPA contributes to influencing poverty-related development policy at national, regional, sectoral, programme and project levels. At CEPA, our emphasis is on providing independent analysis, capacity building of development actors, and seeking opportunities for policy influence. We are influenced by a strong orientation towards service provision that is grounded in sound empirical evidence while responding to the needs of the market. CEPA maintains this market orientation through client requests, and also pursues a parallel independent research agenda based on five broad thematic areas: such as post conflict development, infrastructure, migration, environment as well as the facets of poverty (which explores the broader aspects of poverty and vulnerability).

# Acknowledgements

The Centre for Poverty Analysis (CEPA) would like to thank the European Union for supporting this study. The study was undertaken as part of the project on “Co-creating social development and good governance: Fostering cooperation between CSOs and government authorities for better social services” in which CEPA partners with ACTED. CEPA took the lead in the design and the conduct of the CRC survey.

This study was made possible by the support extended to us by the District Secretaries, Additional Secretaries, Assistant Commissioners of Local Government (ACLGs), Secretaries of Pradeshiya Sabhas (PSs) in the Batticaloa, Monaragala, and Mullaitivu Districts and Educational Zonal Directors, Deputy Directors of Education (DDEs) and officers of Mullaitivu, Batticaloa, and Monaragala.

CEPA wishes to thank the Civil Society Organisations from Mullaitivu District listed below that took part in this study. CEPA would also like to acknowledge the invaluable contribution of the parents and students who provided information to enable this study. Further, the assistance provided by the Enumerators along with Anusha Sivalingam and Shehana Mirza of CEPA to conduct the survey is highly valued.

# 1. Introduction

## 1.1. The Project

The European Union funded project “*Co-creating social development and good governance: fostering cooperation between CSOs and government authorities for better social services*” aims to strengthen and enhance the capacity of Civil Society Organisations (CSOs) to collaborate with government authorities to promote better access and improved quality of public services, while ensuring the accountability of service providers. ACTED and CEPA have been collaborating to achieve the project results discussed below. While the first study, undertaken during the period of January-February 2018 provided baseline data on the delivery of secondary education services in Mullaitivu, Batticaloa and Monaragala Districts, this benchmarking study (second survey) was undertaken in September 2018 to monitor progress of education services delivery surveyed in the first study.

ACTED has been tasked with delivering the following Results (R1 & R2):

- R1 – The capacity of CSOs to implement their mandates and the ability to actively engage in local social development processes is enhanced,
- R2 – Local needs and gaps in terms of social services are identified through a participatory multi-stakeholder approach and addressed by CSOs and government authorities.

CEPA has been tasked with delivering the following Result- (R3):

- R3 – Enhanced monitoring of social service delivery/quality for better accountability of service providers is promoted, and best practices are disseminated for mainstreaming.

This entailed CEPA to undertake a number of activities which included:

- Identification of public service providers at different levels,
- Selection of enumerators from target CSOs,
- Training enumerators on the Citizen Report Card (CRC) process,
- Facilitation of questionnaire development and data collection,
- Channelling results to government authorities and supporting them in developing plans to address gaps.

## 1.2. Scope of the Report

This report covers the findings of the 2<sup>nd</sup> eCRC survey (benchmarking survey) on the **Delivery of Secondary Education Services** in selected GN (Grama Niladhari) Divisions within **Mullaitivu District**. The survey was carried out in the DS (Divisional Secretary’s) Divisions of **Welioya, Oddusuddan** and **Maritimepattu** in September 2018 as a follow-up to the 1<sup>st</sup> eCRC survey undertaken in January-February 2018.

### 1.3. Objectives of the Study

The specific objectives of the study are:

- (i) To use the CRC as a tool for assessing access, quality and satisfaction of actual users of public services as well as a tool for social accountability and transparency,
- (ii) To proactively disseminate the findings from this study and use them to advocate operational policy and practice reform measures,
- (iii) To present this experience from the actual users for similar initiatives in other public agencies in the other Districts.

### 1.4. Sampling

The eCRC was carried out for two types of services. One was secondary free education and the other was Pradeshiya Sabha services. The eCRC covered 60 GN Divisions selected by ACTED in the Mullaitivu, Batticaloa and Monaragala Districts. The sample size for the survey was determined as 1200 households for selected 60 GNs or 400 households for 20 GN Divisions in each District. The 400 households per 20 GN Division, was then divided according to the number of actual service receivers of each GN Division.

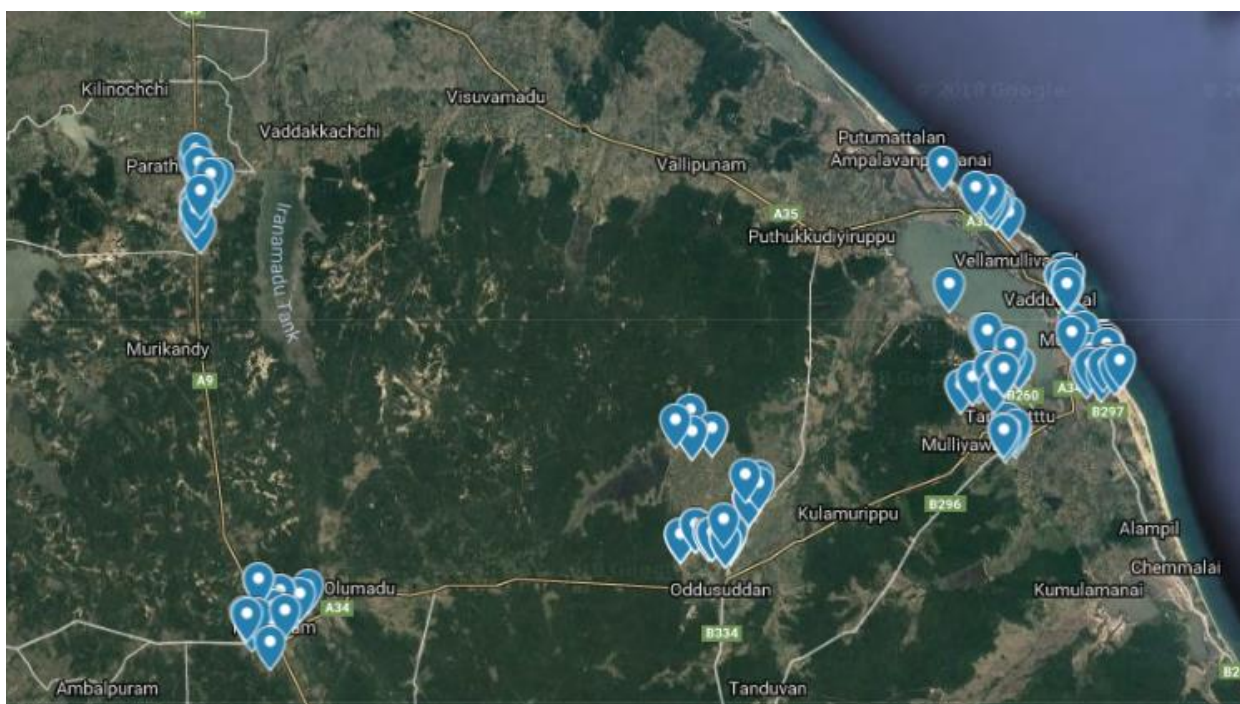

In all three Districts of Batticaloa, Mullaitivu and Monaragala, the sampling process was completed in a number of stages. In the first stage, households with school aged children (attending grades 5 to 13) were identified and listed by CSO members for each GN Division based on data on households within the GN Division. Out of this, the sample of households for the survey was randomly selected according to the calculated sample size for each GN. Meanwhile the sample for the Pradeshiya Sabha services survey was also drawn from the previously mentioned households identified by CSO members for each GN Division, based on the criteria that these households are using at least one public service provided by the Pradeshiya Sabhas. The sampling exercise in each GN Division was undertaken keeping in perspective the ethnic ratios and the spread to achieve wider coverage that is representative of all villages in the GN area. In total, the valid sample that was finalised for analysis, following all quality checks, was 1200 households (400 in Batticaloa District, 400 in Monaragala District, and 400 in Mullaitivu District) for the 60 GN Divisions in all three Districts.

Where possible, the same households were surveyed during the second round of the eCRC survey. However, it was not a requirement or priority for data collectors to go back to the same households, as feedback from all households in the study area, regardless of whether or not they took part in the first study, is valid for drawing conclusions on the progress of service delivery as the services are intended for the entire community.

Sampling was undertaken based on the sampling matrix below:

| Population (Households) | Sample size to be selected based on the households (95 % Confidence level) | Sample size to be selected based on the households (90 % Confidence level) |
|-------------------------|--|--|
| 100                     | 80   | 66   |
| 500                     | 217  | 141  |
| 1000                    | 278  | 164  |
| 5,000                   | 357  | 189  |
| 10,000                  | 370  | 192  |
| 30,000                  | 379  | 195  |
| 50,000                  | 381  | 195  |
| 100,000                 | 383  | 196  |
| 200,000                 | 383  | 196  |

Satellite imagery was used for the sampling process, and given below is a representative satellite image of the study area.

## 1.5. Methodology

### 1.5.1. What is a Citizen Report Card?

The Citizen Report Card (CRC) is a simple, yet a powerful tool that can solicit systematic and actual user feedback on the performance of public services. It is a participatory survey that collects feedback on the quality and adequacy of public services from actual users. The CRC provides a sound basis and a proactive

approach for communities, CSOs or local governments to engage in a dialogue with service providers and hold them accountable for improving the delivery of public services. Although the CRC was initially being conducted in urban contexts, it is now being applied in a wider range of geographic settings and sectoral contexts to understand the status of public service delivery.

The CRC presents a number of benefits. It offers service providers a cost-effective means of finding out if public services that they provide reach the public, especially the more underserved members of the community. In turn, it provides users of public services an opportunity to convey feedback to local government regarding the quality, efficiency, and adequacy of the services that they receive as well as the problems they face in their interactions with service providers. In cases where there are different service providers, it is possible to compare their ratings across various services. The resultant assessment (based on user satisfaction) is then converted into a 'report card' on the performance of public services for a certain locality. The CRC should not be confused with an opinion poll on public services as the CRC reflects the actual experiences of public services users. For example, the surveys that generate the CRCs only target individuals who have used specific services, and/or interacted with the relevant public agencies.

CRCs have been used by various entities ranging from local and national governments, civil society organisations to development partners in over 20 countries as a tool for citizen engagement and service improvements. As this instrument typically generates data at the intersection of citizen-government engagement, its usefulness can branch out into many areas of influence. For example, it can become the basis for informing public policies and programmes, re-engineering of governance processes and service delivery mechanisms, and restructuring of government and community institutions.

One of the salient features of the CRC is its ability to give a voice to marginalised communities, as was the case with this particular study, which focused on engaging communities from very remote and underserved areas in the Batticaloa, Monaragala and Mullaitivu Districts. The aim was to empower communities to demand for improved and satisfactory service delivery leading to greater self-reliance and sustainability. For the purpose of this study, CEPA focused on assessing prioritised services identified through community based research. The objective was to influence existing practices as well as policies from a pro-poor and rights based perspective.

In addition to community inputs, the study also obtains management response from services providers to facilitate a productive dialogue between service users and service providers. The benefit of the study is enhanced by repeating the survey and determining whether the activities mentioned in the management response (or other interventions) have improved the services to the recipients.

### **1.5.2. What is an Electronic Citizen Report Card (eCRC)?**

The Electronic Citizen Report Card or the eCRC is a revolutionary approach to conducting CRCs harnessing the power and convenience of state of the art technology. The eCRC enables the reliable collection of citizen feedback through an Android-based mobile application while analysing and reporting the information collected in real time. There are several components to the eCRC process:

### **(a) Conducting the survey**

A scientific sample survey of public feedback and experiences is conducted via a tablet using a mobile application. A GPS tracking system in the cell phones/ tablets indicates the location from where data is collected, thereby enhancing the reliability of data collection.

### **(b) Remote monitoring for quality control**

A web-based survey management module enables survey managers to track the progress of the survey on a real-time basis. This module enables remote monitoring and management of survey activities and hence, ensures greater quality control.

### **(c) Data analysis**

Online Dashboard and Data Analysis Tools developed as a part of the eCRC addresses the information needs of various stakeholder groups (e.g. policy makers, administrators, political representatives, and citizens etc.). The results of the survey are presented through easy to understand graphs, tables and maps. Simple colour codes are used to facilitate easy inferences on performance levels.

As the eCRC uses mobile tablets and state of the art technology for survey reporting, it has a number of advantages:

- It generates highly accurate data;
- Provides immediate results;
- Enables data / results displayed on a map of the geographic location where the survey is being undertaken;
- It is more cost efficient as it allows the exercise to be repeated with a one-time investment cost.

## **1.5.3. The Designing of the eCRC**

For the purpose of this study, the eCRC survey was designed for 20 selected Grama Niladhari Divisions in each of the Districts of Batticaloa, Monaragala and Mullaitivu. The survey was designed to cover the delivery of services by the Pradeshiya Sabhas and the status of secondary education services in the areas identified for the study. The timing of the survey and other logistical details were finalised in consultation with District Secretaries, Zonal Education Directors and Secretaries of Pradeshiya Sabhas in the Districts concerned. The survey was carried out by a team of Civil Society Organisations (CSOs) that represent each GN Division. The team of CSO members has been trained as a pool of resource persons by CEPA for implementing eCRC surveys in the three Districts with the direct supervision of CEPA researchers as well as ACTED field officers.

## **1.5.4. Identifying Services to be Surveyed through the eCRC**

During focus group discussions (FGDs) with the community, and members of the CSOs, the two issues that emerged as priority areas for improvement were the delivery of (i) Pradeshiya Sabha services, and (ii)

secondary education (year 5 - year 13) services. These priorities also aligned with priorities outlined in the ACTED Village Development Plans (VDPs).

Among these, the priority areas for improvement were identified by the rankings provided by the community and CSO representatives.

In the case of education services, secondary education was identified as a priority through FGDs undertaken with the community.

### 1.5.5. Development of Performance Indicators

A set of specific indicators were identified for secondary education services following a series of consultations with community groups, officials from Zonal Education Offices and Local Government Authorities in the three Districts. The following performance indicators were selected to assess the performance of secondary education service delivery:

| Aspects of Secondary Education Services Delivery | Indicators   |
|--|--|
| Access   | <ul style="list-style-type: none"> <li>• School attendance within / outside GN Division</li> <li>• Regularity of attendance</li> <li>• Reasons for not attending</li> <li>• Attending tuition classes</li> </ul> |
| Quality  | <ul style="list-style-type: none"> <li>• Satisfaction with quality</li> </ul>  |
| Facilities                                       | <ul style="list-style-type: none"> <li>• Availability</li> <li>• Satisfaction</li> </ul>   |
| Teachers   | <ul style="list-style-type: none"> <li>• Availability</li> <li>• Quality of teaching</li> <li>• Teacher's behaviour</li> <li>• Teaching approach</li> </ul>  |

## 1.6. The Study Area

Within the **Mullaitivu District**, this study covers a number of areas under the Pradeshiya Sabhas and Zonal Educational Offices in the **Maritimepattu**, **Oddusuddan**, and **Welioya** DS Divisions as shown in the table below.

| DS Division / Pradeshiya Sabha  | Name of proposed GNs | Number of Villages | Number of Households |
|---|----------------------|--------------------|----------------------|
| Maritimepattu DS Division /Maritimepattu PS / Mullaitivu Zonal Education Office                           | Vattapalai           | 2                  | 443                  |
|   | Kallapadu South      | 2                  | 517                  |
|   | Selvapuram           | 1                  | 437                  |
|   | Mamoolai             | 2                  | 375                  |
|   | Keppapilavu          | 2                  | 390                  |
|   | Mulliwaikkal East    | 2                  | 464                  |
|   | Mulliwaikkal West    | 2                  | 331                  |
|   | Sillawaththai        | 3                  | 475                  |
|   | Mulliyawalai North   | 2                  | 336                  |
|   | Mullaitivu South     | 2                  | 276                  |
| Oddusuddan DS Division / Pudukkudiyiruppu PS/ Thunukkai Zonal Education Office                            | Muththayankaddukulam | 4                  | 376                  |
|   | Katchilaimadu        | 3                  | 303                  |
|   | Oddusuddan           | 5                  | 355                  |
|   | Viththiyapuram       | 2                  | 259                  |
|   | Mankulam             | 6                  | 681                  |
|   | Thirumurikandy       | 5                  | 403                  |
|   | Inthupuram           | 2                  | 400                  |
| Welioya DS Division/ Maritimepattu PS/Divisional Education office under Mullaitivu Zonal Education Office | Nikawewa South       | 2                  | 577                  |
|   | Janakapura           | 4                  | 673                  |
|   | Kiribbanwewa         | 1                  | 367                  |

## 2. Key Findings

The eCRC survey gathered data on access to secondary education, quality of education, facilities and other issues faced by secondary school children in the study area. The subsequent sections discuss the progress made in these areas during the period of May - September 2018. Baseline data collected during the 1<sup>st</sup> eCRC survey is referred to as **Wave 1** or the **first wave** and data collected during the 2<sup>nd</sup> eCRC survey is referred to as **Wave 2** or the **second wave** in the discussion below.

### 2.1. Access to Secondary Education

**Figure 1** presents school attendance within one's own GN Division. The data reveals that the percentage of school children attending schools within one's own GN Division during the second wave was particularly high. In Oddusuddan DS Division, 76% of the secondary school children are attending schools within their own Division during the second wave. It seems that some school children have moved to schools within their own GN Divisions due to improvements in these schools, particularly due to the Thunukkai Zonal Education office. In Oddusuddan DS Division, taking an active interest in improving education service delivery within the division subsequent to the first eCRC survey was apparent. In Maritimpeattu and Welioya DS Divisions, by the second wave, only less than half the secondary school children attended schools within their own DS Divisions.

**Figure 1: School Attendance within One's GN Division**

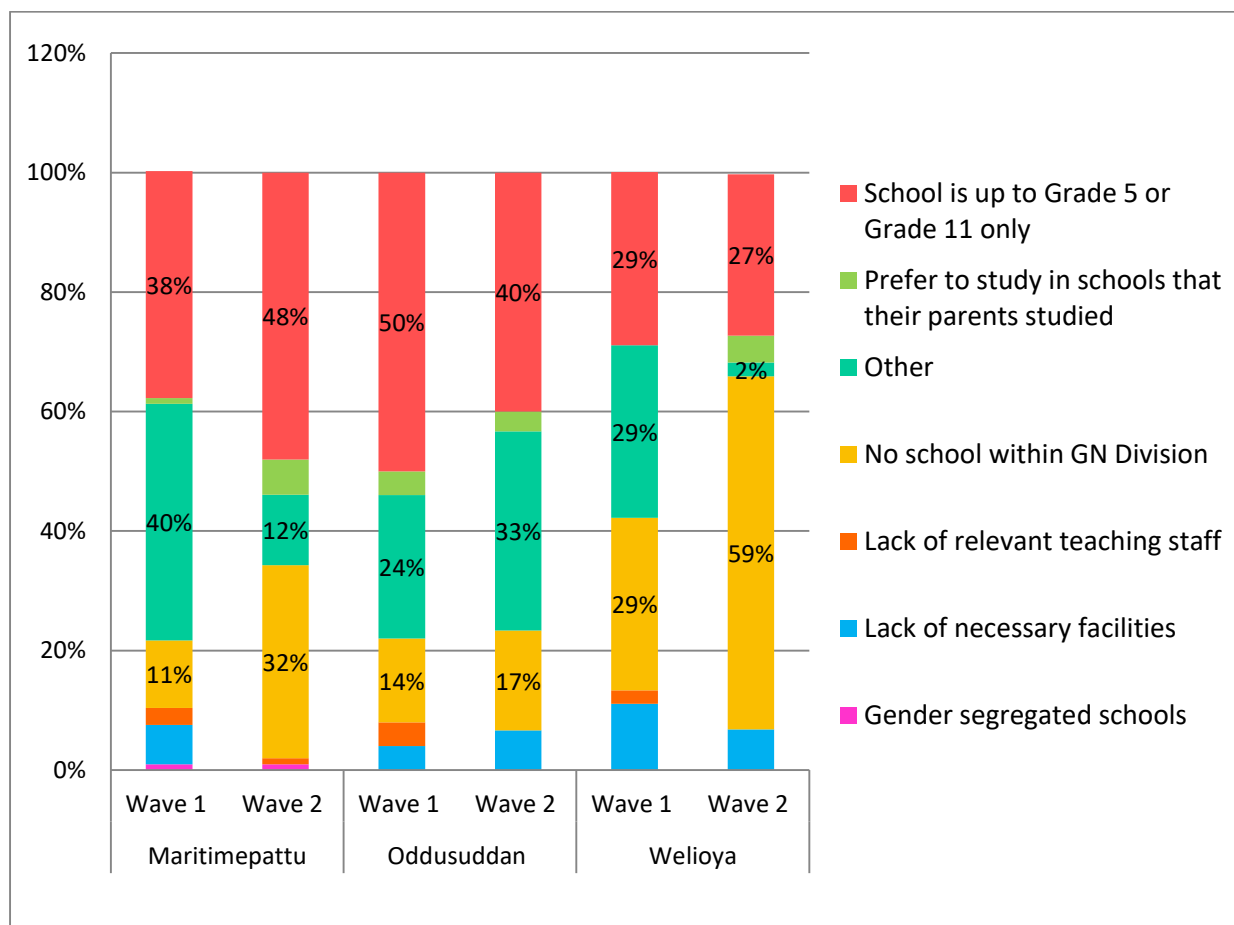

On probing into the reasons for attending schools outside of one's GN Division, there were varying reasons cited as shown in **Figure 2**. During both the first and second wave, one of the key reasons cited was that the school within one's GN Division offered classes only upto a certain grade (grade 5 or 11), which compelled them to attend schools that offer the higher grades outside their GN Divisions. Another frequently cited reason during the second wave was that, there is no school within one's GN Division and therefore, the need to attend an outside school. This is particularly evident in Welioya DS Division during

the second wave with close to 60% of the children citing this as the reason for attending a school outside their GN Division.

**Figure 2: Reasons for Attending School Outside One’s GN Division**

## 2.2. Quality and Satisfaction with Secondary Education Services

**Figure 3** indicates the satisfaction levels expressed by both parents and secondary school students. The graph provides a comparison of satisfaction levels during both the first and second wave. In all three DS Divisions, high levels of satisfaction have declined during the last four months. A large majority of the students in Welioya are only moderately satisfied with the quality of education they receive. During the same period, low satisfaction levels have risen in all three DS Divisions. This is particularly noticeable in Oddusuddan DS Division. In general, reasons given for low satisfaction included:

- Lack of relevant teachers to teach certain subject matter;
- Teachers do not arrive on time;
- Teachers’ attendance is hampered by transport issues due to poor conditions of access roads, while limited bus services are available at particular times only;

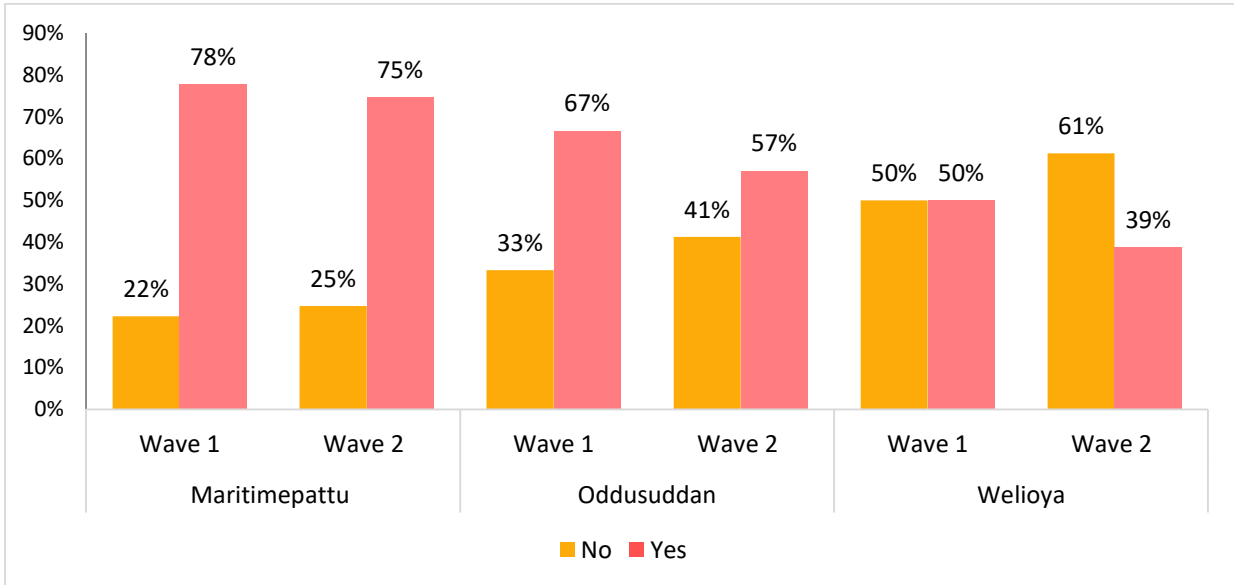

- There are no opportunities for additional classes or for participation in extracurricular activities at national events;
- Practical classes are not conducted in a satisfactory manner;
- Classes are held only up to Grade 9;
- Lack of necessary infrastructure and facilities in schools; and
- Issues with teaching methodology as some schools are taught by volunteers or Civil Security Force personnel. This is particularly prevalent in Welioya DS Division.

**Figure 3: Overall Satisfaction Regarding Quality of Education**

The proportion of students attending tuition classes in the three DS Divisions is presented in **Figure 4**. There is a considerable increase in students attending tuition in the last four months in Maritimepattu and Oddusuddaan DS Divisions as illustrated in **Figure 4**. While there are issues with the quality of education in schools for students to require additional classes, the increase in attending tuition coincided with the timing of data collection for the second wave which took place in September 2018, leading up to the Ordinary Level Exams in December 2018. School children usually attend tuition more frequently leading up to exams, which explains the reason for majority of the school children claiming that they attended tuition during the second wave than during the first wave. It should also be noted that when a large proportion of students attend tuition classes, the likelihood of having issues relating to the quality of education in schools within those DS Divisions possible due to lack of relevant and qualified teachers for certain subjects or simply lack of teachers in general in these schools. Reasons cited by students for attending tuition was that they wanted to gain additional knowledge; syllabuses were not covered in schools; difficulties in understanding what was taught in school; teachers not paying enough attention; and compelled to attend because friends are attending tuition.

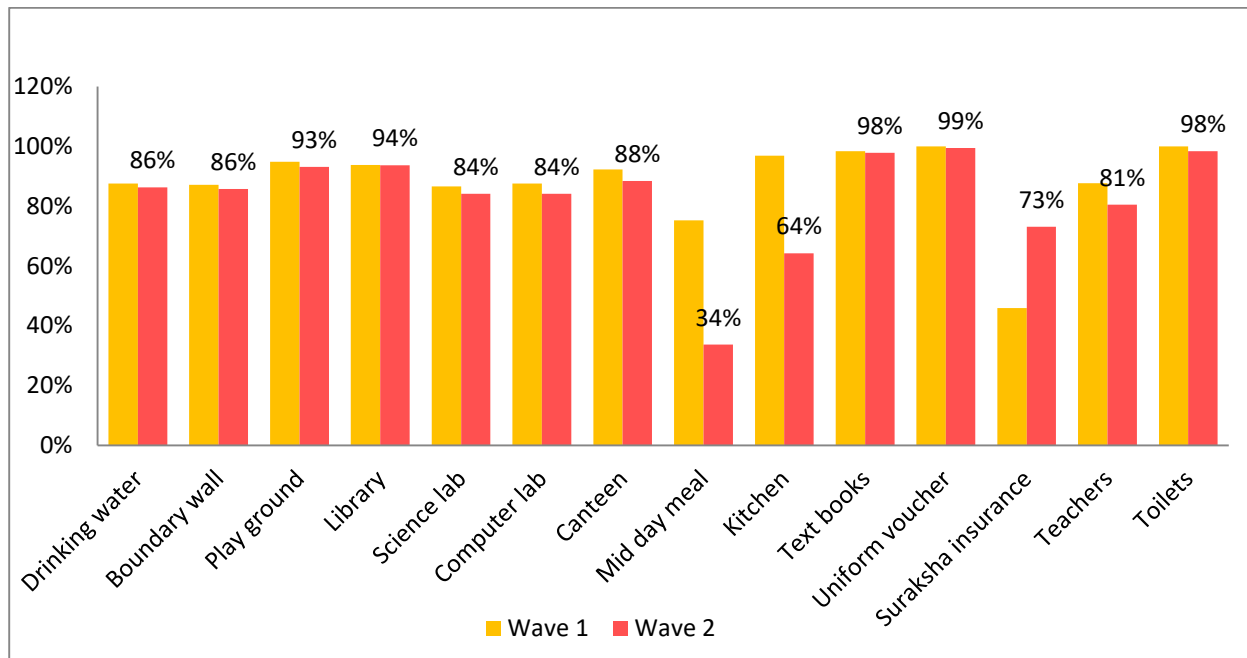

**Figure 4: Students Attending Tuition Classes**

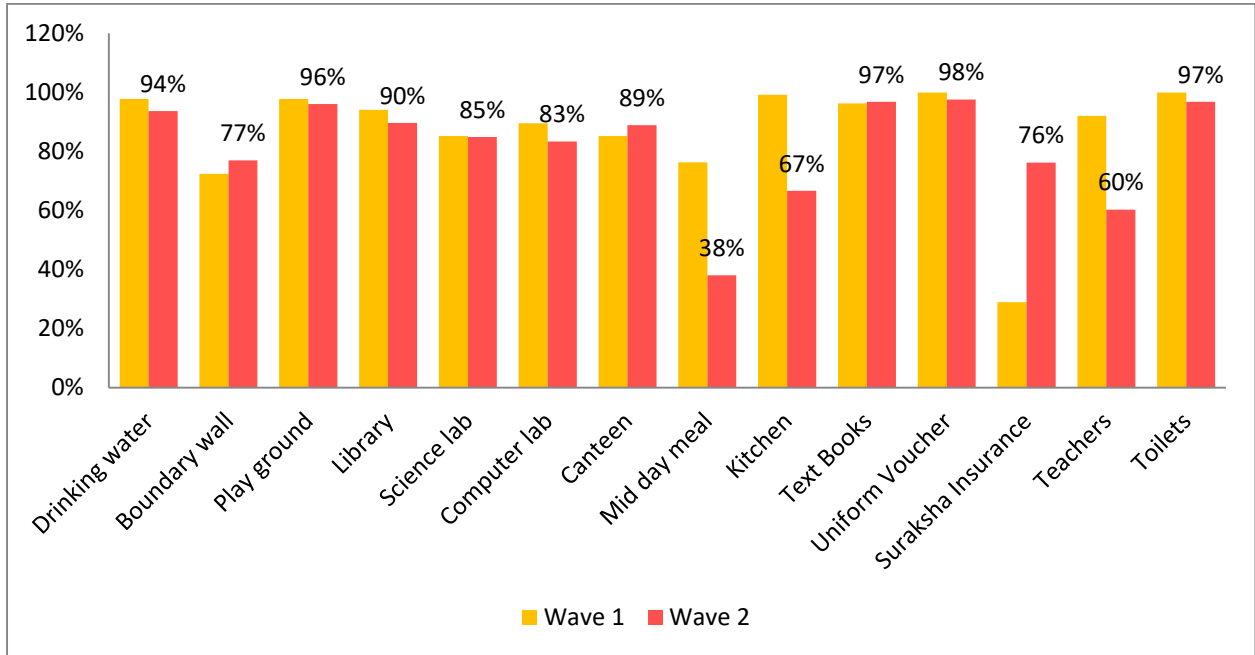

## 2.3. Facilities

Figure 5, 6 and 7 provide an overview of the facilities available to secondary school children in the Maritimepattu, Oddusuddan and Welioya DS Divisions respectively.

**Figure 5: Availability and Usage of Facilities in Maritimepattu DS Division**

**Figure 6: Availability and Usage of Facilities Oddusuddan DS Division**

**Figure 7: Availability and Usage of Facilities Welioya DS Division**

While most facilities surveyed are available to the majority of students in the study area, there are some noticeable gaps in the availability of facilities such as mid-day meals, kitchen facilities, adequate teachers and Suraksha insurance in all three DS Divisions. However, the availability of Suraksha insurance has increased over the last four months with approximately 75% of the students indicating that this is available to them, especially during the second wave. Ideally, the Suraksha student insurance scheme should be available to all students in Sri Lanka. It is likely that some respondents have indicated that insurance is not available to them purely because they lack awareness about this facility, although there is an improvement in awareness during the second wave. Therefore, this indicates that there is still a need to

build awareness regarding the availability of the Suraksha facility for all students to gain benefits they are entitled to; especially, students in underserved areas who would benefit the most. In regards to availability of teachers, there is a decline in this indicator in Maritimé pattu and Oddusuddan DS Divisions while Welioya DS Division shows a noticeable improvement in the availability of teachers (71%), although this is not yet at an optimum level. In the case of mid-day meals, the requirement is that primary school children or schools with less than 100 students are given mid-day meals. It is not mandated for secondary school children to receive a mid-day meal which is why the survey reflects that this facility is lacking in the areas surveyed. However, secondary school children expect that they should also receive mid-day meals because their younger siblings in primary school receive a mid-day meal.

It was also noted that close to 100% of the school children received uniform vouchers and text books. In regards to uniform vouchers, there was a preference for receiving vouchers as opposed to receiving uniform material as was the case previously. Some children used the vouchers to purchase other requirements such as shoes or other clothing items. However, the disadvantage of uniform vouchers is that, it can be inconvenient for students in very remote areas to travel a considerable distance to a commercial centre to purchase the uniforms / material, using the voucher.

## 2.4. Additional Payments

The eCRC survey also revealed that a considerable number of students have incurred additional costs as they have been required to make various payments to their schools.

**Figure 8: Additional Payments Requested by Schools**

As shown in **Figure 8**, payments requested are mostly in cash although a very small number indicated that they were asked to pay in kind. In all three Divisions, the number of students required to make additional payments have increased substantially during the second wave. In most cases the students were issued with receipts for these payments, but a noticeable number of students have indicated that they have not

been issued with receipts as shown in **Figure 9**. Such transactions require investigation to ascertain their legitimacy.

**Figure 9: Receipts Provided for Additional Payments Made to Schools**

## 2.5. Other Inconveniences

Some of the school children surveyed indicated that they have encountered punishment related issues at their schools (see **Figure 10**). Maritimepattu and Oddusuddan DS Divisions show a slight increase in the proportion of school children reporting punishment related issues in schools while Welioya DS Division shows a slight decline with regards to this issue.

**Figure 10: Punishment Related Issues in Schools**

As shown in **Figure 11**, there is a noticeable increase in the number of students who received corporal punishment (beatings with a cane) in the second wave in both Maritimepattu and Oddusuddan DS Divisions. It is possible that during the second wave, feedback was gathered more from younger school children than in the first wave. In practice, younger school children receive more disciplinary action than older students, and therefore, there is a noticeable increase in students reporting corporal punishment during the second wave. Corporal punishment in schools has been banned in Sri Lanka. However, it is quite concerning that the most frequent form of punishment given to students is caning in all three DS Divisions.

**Figure 11: Types of Punishments Given to Students**

As indicated in **Figure 12** and **Figure 13**, students also reported cases of discrimination and abuse (physical, emotional, verbal) in schools.

**Figure 12: Incidences of Discrimination in Schools**

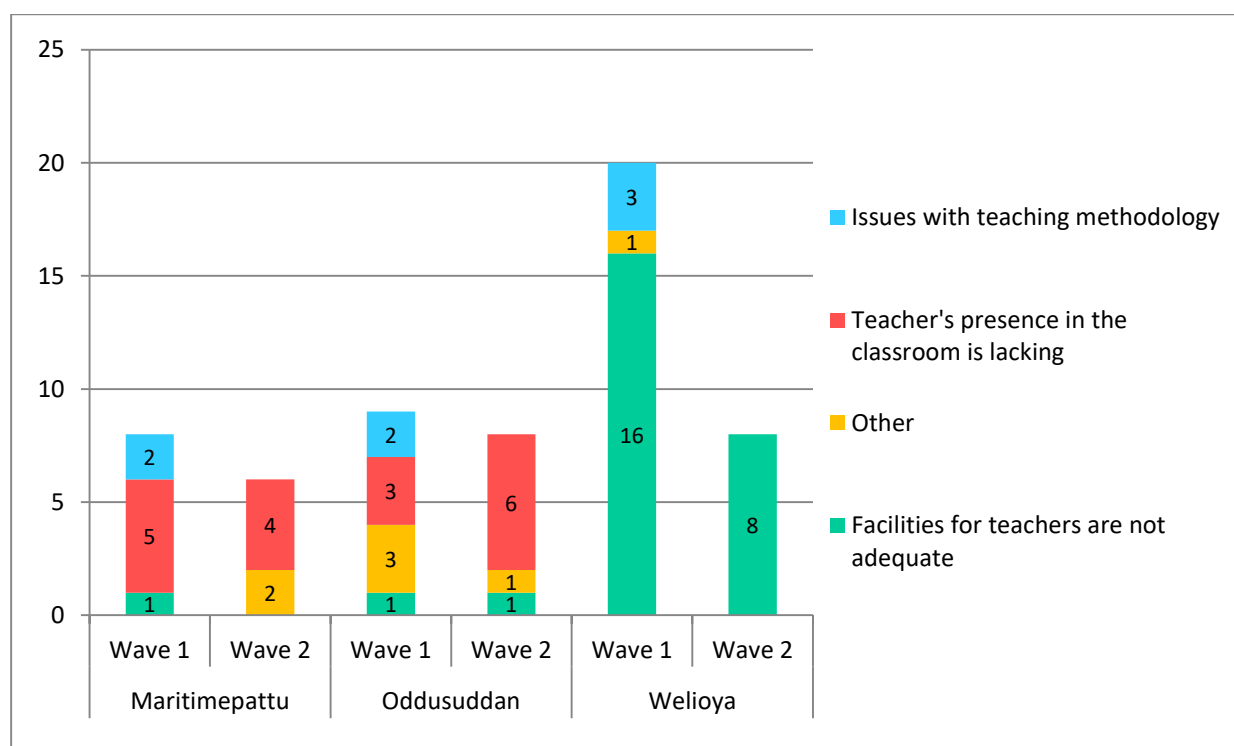

**Figure 13: Incidences of Abuse in Schools**

A noticeable number of discrimination incidents are reported from Maritimepattu and Oddusuddan DS Divisions and these show a slight increase during the second wave. With regards to abuse, there are a few cases of abuse reported during the second wave but there is an overall decline in the number of cases reported. The authorities should pay attention to these cases, as abuse and discrimination can have serious implications of human rights violations in schools.

Issues with regards to teachers impact on the quality of education. Students reported issues relating to teachers in all three Divisions during the second wave as illustrated in **Figure 14**.

**Figure 14: Issues Relating to Teachers**

Teacher related issues show a considerable decline in Welioya DS Division, while the lack of facilities for teachers still appears to be the predominant issue in this Division. The lack of facilities for teachers, inevitably make it difficult for these schools to retain teachers. Respondents have suggested that it is necessary to provide teachers quarters in order to address this issue. Maritimepattu and Oddusuddan also show a slight decrease in teacher related issues. However, the lacks of teachers' presence in the classroom is a key issue in these two Divisions.

### 3. Overall Scoring for Secondary Education Services

**Figure 15** indicates the scoring given to the performance of secondary education services delivery in the three DS Divisions. Scoring is provided based on the percentages of satisfied users of secondary education services.

For example, the colour coding denotes the following:

| Colour  | % of highly satisfied users     | Action required   |
|---|---------------------------------|---|
|  | Satisfied users below 40%       | Needs urgent attention  |
|  | Satisfied users between 40%-60% | Needs improvement   |
|  | Satisfied users above 60%       | Needs to maintain performance or require improvements to continue |

*\*Satisfied users include both highly and moderately satisfied service users*

As shown in **Figure 15**, secondary education service delivery in most areas is marked green during the second wave. Satisfaction levels have improved in some of these areas (indicated by the upward pointing arrows). However, there is room for more improvement and most of the service areas will benefit from continued attention by the Zonal Education offices.

Figure 15: Overall Ratings for Secondary Education Delivery

|               | Drinking Water | Toilet | Playground | Boundary Wall | Library | Science Lab | Computer Lab | Canteen | Mid Day Meal | Kitchen | Text Book | Uniform Voucher | Teachers | Suraksha Insurance |
|---------------|----------------|--------|------------|---------------|---------|-------------|--------------|---------|--------------|---------|-----------|-----------------|----------|--------------------|
| <b>Wave 2</b> |                |        |            |               |         |             |              |         |              |         |           |                 |          |                    |
| Maritimepattu | 84% =          | 86% ↓  | 76% ↑      | 67% ↓         | 87% ↓   | 80% ↓       | 82% ↑        | 85% ↑   | 83% ↓        | 82% ↓   | 95% ↑     | 98% ↓           | 99% ↑    | 99% ↑              |
| Oddusuddan    | 82% ↓          | 85% ↓  | 69% ↓      | 52% ↓         | 86% ↓   | 83% ↓       | 72% ↓        | 75% ↓   | 94% ↓        | 84% ↓   | 94% ↑     | 99% =           | 96% ↓    | 96% ↓              |
| Weliyoa       | 85% ↑          | 95% ↑  | 89% ↑      | 90% ↑         | 90% ↓   | 80% ↓       | 83% ↓        | 88% ↓   | 0% ↓         | 86% ↑   | 98% ↑     | 97% ↑           | 94% ↓    | 98% ↑              |
| <b>Wave 1</b> |                |        |            |               |         |             |              |         |              |         |           |                 |          |                    |
| Maritimepattu | 84%            | 91%    | 68%        | 68%           | 89%     | 83%         | 79%          | 79%     | 94%          | 88%     | 88%       | 99%             | 98%      | 76%                |
| Oddusuddan    | 87%            | 96%    | 97%        | 63%           | 92%     | 91%         | 82%          | 97%     | 100%         | 90%     | 92%       | 99%             | 98%      | 100%               |
| Weliyoa       | 84%            | 85%    | 83%        | 89%           | 93%     | 82%         | 87%          | 100%    | 97%          | 85%     | 95%       | 82%             | 95%      | 94%                |

## 4. Recommendations

### 4.1. Service-wise Areas for Improvement

#### 4.1.1. Areas for Immediate Attention

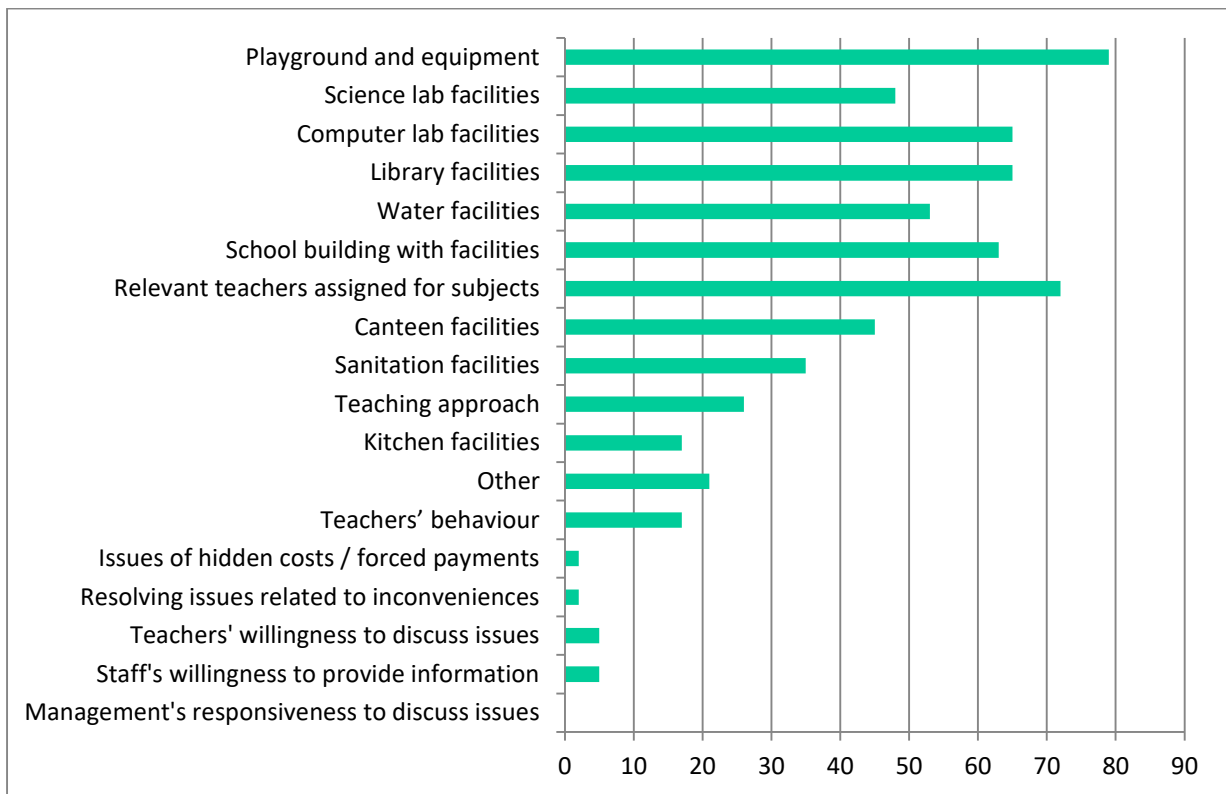

The eCRC survey results revealed a number of areas that the respondents identified as requiring immediate attention. These are summarised for each DS Division in **Figures 16, 17 and 18**.

In the Maritimpattu DS Division, the key priorities for immediate action include playground facilities, computer labs, and science labs. In Oddusuddan DS Division, the key priorities for immediate action include playground facilities, computer labs, library facilities and assignment of relevant teachers for subject matter taught in schools. In Welioya Division, key priorities for immediate action include playgrounds, science labs and computer lab facilities. It is recommended that these priority areas are considered for immediate action.

**Figure 16: Areas for Immediate Action in Maritimpattu Division**

**Figure 17: Areas for Immediate Action in Oddusuddan Division**

**Figure 18: Areas for Immediate Action in Welioya Division**

### 4.1.2. Suggestions for Improvements

In instances where respondents were dissatisfied with the delivery of secondary education services in general, they identified a number of reasons for dissatisfaction such as access issues; lack of necessary facilities; lack of maintenance of facilities; and lack of proper monitoring and oversight from relevant authorities. Suggestions made by respondents for improving the delivery of secondary education services emphasised the need for better monitoring and supervision of service delivery by the relevant authorities; and measures to prevent discrimination of students in schools. Respondents also suggested that similar studies of this nature should be undertaken through the zonal education offices at least once a year to track progress of secondary education service delivery.

### 4.1.3. Other Considerations

The findings from this study are useful (especially the scoring provided in **Figure 15**) for measuring the progress made, and for identifying areas that need closer/ immediate attention. Service delivery gaps highlighted in this study should be examined more closely to understand how these can be addressed. The immediate priorities identified should be considered for planning future interventions to improve the delivery of secondary education services in the three DS Divisions.

## 4.2. Way Forward

Action plans (see Annex 1) were prepared based on the preliminary findings of the 1<sup>st</sup> eCRC survey in May 2018. These findings were presented to senior officials of Local Government, Secretaries of Pradeshiya Sabhas and community representatives. Discussions between service providers and service users were facilitated to produce actions plans identifying short term / long term actions for improving secondary education services before the second round of the eCRC survey in October 2018. These action plans are particularly useful for CSOs to track progress and accountability of service providers.

The 2<sup>nd</sup> eCRC survey was undertaken in October 2018, to follow-up on progress against the ratings provided for secondary education services delivery during the 1<sup>st</sup> eCRC survey. The colour coding provided below was used for indicating satisfaction levels and for highlighting priority areas that need to be addressed. **Figure 15** provides a comparison between the satisfaction levels during the baseline study (first wave) and the follow-up study (second wave). Any changes in colour reflect changes in satisfaction levels, thereby indicating level of progress / relapse that has taken place during the last four months.

| Colour  | % of highly satisfied users     | Action required   |
|---|---------------------------------|---|
|  | Satisfied users below 40%       | Needs urgent attention  |
|  | Satisfied users between 40%-60% | Needs improvement   |
|  | Satisfied users above 60%       | Needs to maintain performance or require improvements to continue |

*\*Satisfied users include both highly and moderately satisfied service users*

It should be noted that even if a colour change is not evident, an increase in the percentage denoting satisfaction levels can be considered as progress made in terms of service delivery.

With regards to improved satisfaction levels, in general it was observed that the 1<sup>st</sup> eCRC survey findings provided awareness and the motivation for users to engage in a productive dialogue with the providers regarding service improvements they needed. This has prompted service providers to take greater action to improve services in certain areas leading to greater satisfaction levels among the users.

Therefore, the progress tracking chart in **Figure 15** offers a number of advantages. It provides an opportunity for service users to communicate their levels of satisfaction regarding public services and insist greater accountability / action from service providers. It is also a useful tool for public representatives to demonstrate to the public, how service delivery improvements have taken place from the first wave to the second wave in their respective electorates.

The information provided in this eCRC can be used for launching further investigations into problem areas keeping in mind that the findings in the eCRC are signposts based on community feedback, pointing to where more complex issues relating to service delivery may reside. Deeper probing is required to understand the causes that underpin these issues.

To undertake focused action, the following is recommended:

- Based on the eCRC ratings, identify delivery performance areas that are particularly weak,
- Investigate underlying causes and factors that obstruct effective service delivery, diagnosing gaps that need to be filled for the services to improve.
- A combination of interventions is required to address service delivery gaps,
- Once delivery gaps are addressed, following up on the satisfaction levels of the service users is required to determine if delivery performance has improved from the benchmarked levels.

## Annex 1: Action Plans (from the first eCRC)

### Action Plan - Zonal Education Office – Mullaitivu

|   | Priority Service<br>- What Service | Short term/ Long term  | Who is responsible for the work             | Other stakeholders responsible for improvements | Start Date                 | End Date                     | Who is monitoring the progress | Participation in 2nd CRC |

**Date 14.05.2018 - Divisional Educational Office – Sampath Nuwara**

Under the European Union funded project "Co-creating social development and good governance: Fostering cooperation between CSOs and government authorities for better social services" CEPA undertook follow-up electronic Citizen Report Card (eCRC) Surveys in selected Grama Niladhari Divisions within the Batticaloa, Monaragala and Mullaitivu Districts during September - October 2018. This second round of eCRC surveys aimed to determine the progress made in terms of quality of services, accountability of service providers and areas for improvement in the two sectors previously surveyed:

- (i) delivery of secondary education services and
- (ii) delivery of public services by Pradeshiya Sabhas, within the study area.

This report presents the findings of the second eCRC survey at DS Divisions with the objective of attempting to use the eCRC as a tool for assessing access, quality and satisfaction of actual users of public services as well as a tool for social accountability and transparency. The second eCRC survey results revealed progress made as well as a number of areas that the respondents identified as still needing attention and action to improve service delivery within the three Districts. Based on the preliminary findings of the first eCRC survey undertaken in January - February 2018, action plans were prepared and discussions between service providers and service receivers were facilitated, subsequently followed by the second eCRC survey. This report has been prepared to proactively disseminate the findings from second survey and to use this information to advocate operational policy and practice reform measures, where needed.
